Executive summary on 2008 Missouri vehicle stops

- Background
- Statewide Findings
- Analysis by Attorney General Koster
- Appendix A: Local traffic stops in proportion to state racial composition
- Appendix B: Disparity indexes for 2000-2008 are compared
- Appendix C: Key indicators using 2000 census figures for each jurisdiction

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law Section 590.650, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each vehicle stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, professor and director of the School of Criminology and Criminal Justice at Arizona State University; Richard Rosenfeld, professor in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Jeffrey Rojek, assistant professor in the Department of Criminology and Criminal Justice at the University of South Carolina.

Table 1. 2008 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other

Population	4,676,322	3,917,100	503,115	106,318	72,334	22,925	54,530
Stops	1,633,610	1,294,198	278,923	35,169	13,097	1,531	10,692
Searches	128,652	90,250	32,376	4,945	427	135	519
Arrests	92,945	65,201	23,520	3,478	297	101	348
Statewide population %	100%	83.76%	10.76%	2.27%	1.55%	.49%	1.12%
Disparity index	- - -	.95	1.59	.95	.52	.18	.56
Search rate	7.88%	6.97%	11.61%	14.06%	3.26%	8.82%	4.85%
Contraband hit rate	19.09%	20.35%	16.57%	13.45%	13.56%	21.48%	14.07%
Arrest rate	5.69%	5.04%	8.43%	9.89%	2.27%	6.60%	3.25%

Notes: Population figures are 2008 census estimates for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

[back to top]

II. STATEWIDE FINDINGS

This report summarizes the data from 639 law enforcement agencies in Missouri for 2008. An additional 65 agencies indicated they made no vehicle stops during the year. This represents almost 98.5 percent of the 715 law enforcement agencies in the state.

The agencies filing reports recorded a total of 1,633,610 vehicle stops, resulting in 128,652 searches and 92,945 arrests. Table 1 breaks out the stops, searches and arrests by race and ethnic group. Footnote 1

The population totals in the table are census estimates for 2008 compiled by Geolytics Inc. In reports for years prior to 2005, the population totals were from the 2000 census. The estimated totals are used in this report to reflect population change in Missouri since 2000. “These estimates,” according to the U.S. Census Bureau, “are used in federal funding allocations, as denominators for vital rates and per capita time series, as survey controls, and in monitoring recent demographic changes” (emphasis added; see www.census.gov/popest/estimates.php). Footnote 2

Four summary indicators are included in Table 1 that may be useful in initiating further assessments of racial profiling in vehicle stops. The first, termed the “disparity index,” relates each group’s proportion of total vehicle stops to its proportion of the driving-age population 16 and older.

A value of 1 on this index indicates that a group’s proportion of vehicle stops equals its population proportion: it is neither “under-represented” nor “over-represented” in vehicle stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation. For example, the 1,249,198 whites who were stopped accounted for 79.2 percent of all vehicle stops in 2008.

Whites comprise an estimated 83.8 percent of Missouri’s driving age population. The value for whites on the disparity index is, therefore, .95 (.79223/.83765). Whites were stopped, in other words, at slightly below the rate expected based on their fraction of the estimated population age 16 and older.

The same is not the case for several of the other groups. African-Americans represent 10.8 percent of the population 16 and older but 17.1 percent of all vehicle stops, for a value on the disparity index of 1.59.

African-Americans were stopped at a rate 59 percent greater than expected based solely on their proportion of the population 16 and older.

Hispanics were stopped at a rate equal to their population proportion, and Asians, American Indians, and persons of mixed or unknown race were stopped at a rate well below their proportion of the driving-age population.

The values on the disparity index for the groups can be compared directly to one another. For example, the likelihood that an African-American motorist was stopped is 1.67 times that of a white motorist (1.59/.95). In other words, African-Americans were 67 percent more likely than whites to be stopped in 2008.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population 16 and older, and not on the population of motorists on the state's streets, roads and highways.

A group's share of the residential population 16 and older may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case.

The extremely low index values for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the disparity index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to assess racial profiling is the "search rate," or the number of searches divided by the number of stops (x 100). (Searches include searches of drivers or property in the vehicle.)

The search rate for all motorists who were stopped is 7.9 percent. Asians were searched at a rate well below the statewide average, and African-Americans, Hispanics and American Indians were searched at rates above the average for all motorists who were stopped.

The search rates for the groups also can be compared directly with one another. African-Americans were 1.67 times more likely to be searched than whites (11.61/6.97). Hispanics were 2.02 times more likely than whites to be searched (14.06/6.97).

The reasons for conducting a search and the outcome of the search (such as finding contraband) should be considered when making comparisons across groups.

Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. Contraband was found in slightly more than 20 percent of all searches. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest, which means there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding arrest warrant, whether or not contraband may be present.

The third summary indicator, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband was found in 19.1 percent of all searches conducted in 2008. However, there is considerable variation in the contraband hit rate across race and ethnic groups.

The contraband hit rate for whites was 20.4 percent, compared with 16.6 percent for African-Americans and 13.5 percent for Hispanics. This means that on average searches of African-Americans and Hispanics are less likely than searches of whites to produce contraband.

The "arrest rate" is the fourth summary indicator included in Table 1 that may be useful for assessing racial profiling. Just under 6

percent of all vehicle stops resulted in an arrest (92,945/1,633,610). The probability of arrest varies across the race and ethnic groups.

Just over 8 percent of stops of African-Americans and nearly 10 percent of the stops of Hispanics resulted in arrest, compared with about 5 percent of the stops of whites.

There are three appendixes to this year's full report. Appendix A presents the vehicle stop analysis using the statewide proportions of race and ethnicity, rather than those for each jurisdiction.

This year's report compares the 2008 disparity index to the disparity indexes for 2000 through 2007. Footnote 3 These comparisons are presented in Appendix B.

For each agency, the disparity index for each race-ethnic group is presented for 2000-2007. For the state as a whole, the key indicators show very small changes between 2007 and 2008. The disparity index is generally stable across the two years, with a small decrease for Hispanics.

The search rate (the percentage of stops in which a search is conducted) decreased slightly for African-Americans and Hispanics and exhibited a somewhat greater decline for American Indians. The arrest rate for African-Americans dropped slightly (from 9.08 percent to 8.43 percent) and somewhat more for Hispanics (from 11.01 percent to 9.89) between 2007 and 2008.

The third appendix included with this year's report, Appendix C, presents the key indicators using the 2000 census figures for each jurisdiction's race and ethnic populations.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

ANALYSIS BY ATTORNEY GENERAL CHRIS KOSTER

Footnote 4

This report represents the ninth annual analysis of vehicle stop data in Missouri, a review that includes information about more than 1.6 million stops by law enforcement in the state during 2008. This report can be compared to data going back to 2000 on the Attorney General's Web site at ago.mo.gov.

The analysis in 2008, as well as in 2005, 2006 and 2007, used census estimates to reflect the changes in Missouri's population since the 2000 census. That census was the benchmark for the previous five reports.

As our state's population changes in number and demographics, these census estimates can help provide a more accurate benchmark to analyze the data. (Appendix C of this report provides key indicators by each agency using the 2000 census information.)

The overall number of stops reported increased in 2008, after experiencing a decrease in 2007. As it has in the past, the disparity index for African-American drivers continues to be of significant concern. The disparity index for African-American drivers increased slightly from 1.58 in 2007 to 1.59. At the same time, the disparity index for Hispanic drivers decreased from 1.0 in 2007 to .95 in 2008. Both groups continue to have search rates significantly higher than that of white drivers.

These findings continue a disturbing trend for African-American drivers in Missouri. Specifically, the disparity indexes for African-American

drivers have increased each of the last four years, exhibiting disparity indexes of 1.42 in 2005, 1.49 in 2006, 1.58 in 2007 and 1.59 in 2008.

With 639 law enforcement agencies conducting vehicle stops in Missouri, there is no single explanation why these disparities exist. This report provides statistical information so the data from each agency can be examined, and appropriate questions asked of those agencies.

In 2004, state law was changed to require law enforcement to include investigative vehicle stops in their reports, in addition to the stops for traffic violations.

One of the best uses of these reports is as a springboard for dialogue and communication between law enforcement agencies and the communities they serve. It is vital that Missouri law enforcement agencies continue to review the rates of stops and searches and to continue their outreach efforts.

Statistical disproportion does not prove that law enforcement officers are making vehicle stops based on the perceived race or ethnicity of the driver. The compilation and analysis of data, however, does help both law enforcement and the community with a starting point for dialogue to appreciate each other's perspective and arrive at common ground.

I am proud that Missouri took a leading role, under the stewardship of then-Attorney General Nixon, Governor Carnahan and many in the legislature, in passing legislation requiring the collection and examination of vehicle stop data on this scale. I pledge to continue that tradition in carrying on the detailed and critical examination necessary to ensure fairness to Missouri's law enforcement application. It is my hope that this report may serve as a springboard to open dialogue and legislative review.

We continue to show that commitment throught laws that require each law enforcement agency to not only have a written policy regarding racial profiling, but also to provide additional training to officers and to promote the use of effective, non-combative methods for carrying out their duties in a racially and culturally diverse environment.

Missouri's law enforcement members continue to do commendable work in the face of many challenges. I appreciate their efforts and willingness to compile the information for these annual reports.

The number of agencies that did not comply with the vehicle stops reporting law in 2008 continued to be relatively low at 11. This represents an improvement from 2007 when 22 departments failed to report. Nonetheless, failure to report is unacceptable and should be considered so by the General Assembly. A list of these agencies has been turned over to the Governor for imposition of the statutory sanctions.

Along with the data, several individual law enforcement agencies provided other information about factors that may impact their numbers. The reader should consider these factors when examining the data.

Law-abiding drivers have the right to travel throughout Missouri without the fear that they will be stopped based solely on their race or ethnicity. I am confident that Missourians of all races and ehtnic groups and law enforcement officers from throughout the state are committed to this agree with me.

FOOTNOTES

Footnote 1: Hispanics may be of any race. About 1 percent of the population designated two or more races. These persons are included in the "other" category along with persons of unknown race.

Footnote 2: For detailed descriptions of the methodology used in forming the population estimates, see www.census.gov/popest/estimates.php and www.geolytics.com/USCensus,Estimates-Projections,Data,Methodology,Products.asp.

Footnote 3: Caution should be used when comparing 2000 to subsequent years, especially for smaller agencies, because the 2000 figures

are based on only four months of traffic data, while those for subsequent years are based on the full calendar year.

Footnote 4: The executive summary relies upon and updates materials prepared for the 2007 Annual Report published under the administration of Attorney General Jay Nixon.

ACCURACY VERIFICATION

You can view all of the agency reports in two PDF files:
Part 1: Adair County-Lathrop. Part 2: Latour-Wyatt.

Accuracy verification

The Attorney General's Office made extensive efforts to verify and correct all forms where numbers appeared incomplete or inaccurate. Following the March 1 deadline, calls were made to a number of agencies regarding incomplete or inaccurate data.

To the extent that corrections could be determined, they were incorporated into the report. In addition, all agencies were given the opportunity to review their final reports before publication and to make comments. At that point, corrections again were made for agencies and their comments have been included on individual city data sheets under the heading “Agency response.”

RACIAL PROFILING DATA/2008

Agency: Adair County Sheriff's Dept.

Population: 20,147
age 16 and over

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Stops	328	313	6	7	2	0	0
Searches	13	13	0	0	0	0	0

Agency response

Columbia is a growing community with three large manufacturing companies (3M, Square D and Quaker Oats) and several smaller companies (American Air Filters and DANA, to name a few). There is a large state university and two smaller colleges in Columbia. Columbia's daytime population is greater than any other time of day with commuting workers. There is a large shopping mall and Columbia is the conjunction of two major highways (I-70 and Higher 63). There are also five hospitals in Columbia (Ellis Fischel Hospital, University Hospital, Boone Hospital, Columbia Regional Hospital and the VA Hospital).

Agency response

The Carthage Police Department would respectfully like to point out that we have many large industries in our city, including a nationally known poultry plant. These industries bring many good things into our area and we are proud to have them. However, many people that are contacted during traffic stops in our city are not legally in the United States. Carthage is attractive to non-legal citizens hoping to find employment. When these individuals cannot produce valid identification or driver's licenses, our arrest numbers and search incident to arrest numbers are skewed. In addition, a major state highway runs through our jurisdiction bringing many people of diverse backgrounds through Carthage.

RACIAL PROFILING DATA/2008

Agency: Caruthersville Police Dept.

Population: 4,577
age 16 and over

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other

Agency response

The City of Chesterfield, Missouri is an upper middle class community in far west St. Louis County and lies at the crossroads of a major interstate highway (I-64) and Olive Street/Clarkson Road.

Located at this intersection is Chesterfield Mall, the major shopping center in this part of St. Louis County. The customer base at this shopping center has a significant number of African-American customers who reside outside the corporate limits of the City of Chesterfield. In addition to Chesterfield Mall, the world's longest strip mall/shopping center lies to the immediate west with several major interchanges approaching the Chesterfield Commons and exiting from I-64.

The City of Chesterfield workforce has a majority number of employees who reside outside the city limits. Since Metro Bus service is limited and in some cases nonexistent, these employees must drive to work. This increased traffic leads to more traffic congestion and ultimately to traffic law violations.

Agency response

The City of Clayton is the county seat for St. Louis County. It contains the courts, government offices, juvenile detention center and the St. Louis County Justice Center, which houses over 1,000 inmates. In addition, Clayton is the home of several major corporations and contains over 6.5 million square feet of office space and one million square feet of retail. It is estimated that over 80,000 people visit Clayton on a daily basis to work, shop or do business. Most of those visiting Clayton reside in the St. Louis Metropolitan area. Additionally, a number of major thoroughfares run through Clayton carrying commuters from various parts of the county requiring a significant amount of traffic enforcement: I-170, Forest Park Parkway, Hanley Road, Clayton Road, Brentwood Blvd., and Forsyth Blvd. Therefore, it is felt that for the purposes of this study, the racial makeup of the population should be in direct proportion to that of the St. Louis Metropolitan area. At the very least, the racial breakdown should be in line with that of St. Louis County as a whole, rather than the resident population of Clayton. If the racial makeup of St. Louis County was used, the disparity index for blacks in the City of Clayton would be 1.41.

Agency response

The City of Clinton is located on the main route between the Kansas City metropolitan area and the City of Springfield. As a consequence, a large number of non-Clinton residents pass through the City of Clinton. 39% of all traffic stops made by the Clinton Police Department take place on state highways. Given the number of non-resident drivers stopped on state highways for traffic violations, any comparisons utilizing the population of the City of Clinton are inherently flawed.

Agency response

The City of Crestwood is not a self-contained community but is part of a larger geographic region that contains the entire population of St. Louis County and that of St. Louis City. The City of Crestwood contains a major State Highway that is lined with businesses, eating establishments, grocery stores and Crestwood Plaza shopping center, a regional draw shopping center. The mall is also served by three different bus lines on the Metro system. The City of Crestwood also contains a portion of I-44. All of these influence the demographics of the driving public that we deal with.

While Crestwood has a Black population of 0.86 %, St. Louis County, in 2007, had a Black population of 21.8% and the State of Missouri has a Black population of 10.7%. To judge Crestwood's stop data based on our population provides for an inaccurate reflection of the driving public that our officers deal with. Crestwood's Black population does not reflect our region and our driving public.

Agency response

The City of Gladstone contains three sizable apartment complexes along a major thoroughfare through the City that serves as the principal connection to U.S. Highway 169, a well-traveled freeway that connects Gladstone to the City of Kansas City, and links our City to the Kansas City International Airport. Kansas City completely surrounds the City of Gladstone. These three apartment complexes offer government-subsidized housing that contains a disproportionate percentage of minority tenants.

The combination of freeway access, being surrounded by metropolitan Kansas City, concentrations of lower-income minority tenants in three apartment complexes, and the visitor traffic generated by these apartments attracts a higher percentage of minority visitors to Gladstone than the proportion of minority residents of the City would suggest. The Gladstone Public Safety Department has established policies to assure that minorities are not disproportionately subject to stops or arrests by our police officers. These policies are reinforced by active supervision of our law enforcement officers to assure that racial profiling or other discriminatory behavior does not exist.

Agency response

The City of Glendale is a bedroom community in the interior west county area of metropolitan St. Louis. We are at the mid point of four major shopping malls. We have one state highway with an average daily traffic count of over 30,000 vehicles. That number was greatly increased in 2008 due to the shutdown of Interstate 64, which parallels State Highway 100. We have two county arterial roads, both averaging over 10,000 vehicles per day. We are within a half-mile of Interstate 44, which allows for each access to St. Louis and the interstate system.

Agency response

The City of Hazelwood is a destination city for shoppers and employment. Hazelwood is home to approximately 1000 businesses employing over 25,000 employees. We have a 1.3 million square foot under roof shopping mall which attracts over 2 million customers annually. We have Interstate 270 which traverses the city with I-170 intersecting I-270. Each of these interstates carries over 125,000 vehicles per day. We have 3 major north-south arterial roadways through the city carrying over 100,000 vehicles per day. We have numerous minority visitors and motorists who visit and travel to and through the city.

RACIAL PROFILING DATA/2008

Agency: Henrietta Police Dept.

Population: 388

age 16 and over

Agency response

The Independence Police Department is an internationally accredited Police Department that does not tolerate racial profiling. Officers receive annual training on cultural challenges and issues. Last year, we purchased a program called "Law Enforcement Software Solutions" from Columbia, Missouri. This program is an accurate and accountable reporting of our traffic stops. Independence has a minority population that averages, according to the census report, approximately 2.38%. We do share our western border with Kansas City, Missouri. Independence has numerous State and Federal Highways which run through our city. Independence has become a major entertainment city, with I-70 being so close to this area of shopping, restaurants and entertainment, our traffic from other areas has increased. We are committed to ensuring we maintain the accountability and integrity of this process which indicates the level of professionalism within the Independence Police Department.

Agency response

Jasper County has a major University (Missouri Southern State University) and some colleges in the area (Ozark Christian College). We also have a large mall and several major businesses that employ people from the surrounding area (Kansas, Oklahoma). Some examples are: Conway trucking, Legget and Platt, Tri-State trucking, Butterball, Schrieber's, St. John's Hospital and Freeman Hospital. We also have several highways that run through our area – I-44, US 71, 96 Hwy, 43 Hwy.

Agency response

- The amount of searches at car stops decreased for Caucasians 2%, African Americans 4%, and Hispanics 8%. This shows that JPD officers are narrowing the gap for number of searches among the different races.
- Current analysis fails to distinguish between residents and non-residents who are stopped. The daytime population of Joplin is in excess of 270,000 while its resident population is around 50,000. The existence of significant proportions of non-resident stops lead to invalid conclusions if racial comparisons are made exclusively to resident population figures.
- The City of Joplin sits at a crossroads for Interstate 44 and Hwy 71, so numerous travelers pass through on a regular basis.

Agency response

Disparity indexes have not fluctuated significantly since the data collection began in 2000. However, these numbers should be interpreted cautiously. Specifically, relying on the census population for ages 16 and over as a benchmark does not provide a realistic picture of the driving population in Kansas City, Missouri at any given time. There are several major thoroughfares that run through the city, including I-29, I-35, and I-70 that contain a large percentage of drivers not reflected in the static census population used for comparison purposes. Additionally, Kansas City is contained within a metropolitan population of approximately 2.0 million, which adds to the commuter population on the major thoroughfares. Also, when examining search rates, the probable cause/authority to search reasons should be considered. By design, the form on which the AG office submitted the summary report did not include the new category Stop Outcome "Other," which accounted for 5,783 stops. The Total Stops figure, however, includes stops associated with this new category. Lastly, KCPD views vehicle stop data collection as one of many tools to address the issue of racial profiling. Other tools in use by the department include training, community programs, and policies.

Agency response

Kirksville is home to two major universities whose enrollment data is not totally reflected in the census figure. Truman State University and Kirksville College of Osteopathic Medicine account for an additional 6,000 students/residents (2009 numbers indicate that 19.3 of the Truman students are identified as other than white, and 96 percent come from outside Kirksville, including at least 309 international students). Kirksville is located on one of the few major north-south state highways (Highway 63) that service northern Missouri and southern Iowa. 8,700 vehicles per day travel the highway into and out of town. Kirksville is the largest city for miles and is the cultural/economic hub for a very large area. This expands the pool of those not counted in the city's census information.

Agency response

Interstate 70 borders the City of Lake Saint Louis to the north and U.S. 40/61 bisects the south end of the municipality, resulting in a fair amount of non-local traffic. Consequently, many drivers stopped for traffic violations in this venue are non-residents. Because of this, calculating a disparity index based on a comparison of ethnicity of drivers stopped with the ethnicity of the local population may be misleading.

Agency response

Maryland Heights has 1,802 businesses, which employ approximately 45,000 people. Maryland Heights is the host city of Harrah's Casino, which had 8,750,946 visitors in 2008. The 20,000 seat Verizon Wireless Amphitheater had 360,396 visitors in 2008. The city has 21 hotels with 3,616 rooms. Maryland Heights has 65 liquor establishments selling alcohol by the drink. Finally, the section of I-270 in Maryland Heights has an average daily traffic count reported by MoDOT of 172,142 vehicles, second highest in the state. The annual demographics of the 62,831,830 vehicles on I-270; the 8,750,946 visitors to the casino; the 360,396 visitors to the amphitheater; and the 45,000 people employed in Maryland Heights are not known and impact the validity of this report.

Agency response

The traffic stops report for Normandy also includes the Pasadena Park stops. Pasadena Park has a population of 489. By adding the number of Pasadena Park residents to the number of Normandy residents, our disparity index will drop and show a more accurate number.

Agency response

North Kansas City has a list of demographics that makes it a challenge to discern meaningful data regarding racial profiling analysis. The city is only 4.5 square miles, with less than 5,000 residents; however, 6 highways travel through the city limits carrying an estimated 200,000 vehicles a day. Furthermore, the city's daily workforce/daytime population is estimated at 30,000 people at over 1,100 businesses. There is no information regarding the race/sex makeup of the daily motorists or the workforce. Due to the small size of the department and the unique "Urban Village" description, we are not able to compare individual officer's statistics with other officers working in a similar environment.

Agency response

Norwood, MO is a small town that sets off Highway 60 in southern Missouri. We are approximately 54 miles east of Springfield. We have State Highway C that runs south throughout the town, and also State Highway PP that goes off Highway C. We have no shopping malls, interstates or large employers that are close, however, we do have a school.

Agency response

The City of Oak Grove lies along Interstate I-70 and is within the Kansas City Metropolitan area. There are also two large truck stops and a Wal-Mart located within the City of Oak Grove that, coupled with the geographic location, affect the daily motorist and population demographics significantly.

Agency response

Olivette is a major corridor for the St. Louis Metropolitan area with major interests and roadways that pass through or are immediately adjacent to the city. These interstates and roadways are the pipeline connecting thousands of people traveling into and through Olivette for business and pleasure purposes. These roadways also serve thousands of motorists throughout the region traveling to and from various destinations. Thus, the motorists stopped for traffic violations are more reflective of the population of the metropolitan area rather than the resident population of Olivette. Starting the first quarter of 2008, MoDot began the Highway I-64/US 40 construction project which has increased the number of traffic stops by local law enforcement as more commuters utilized alternate routes, including Olive Boulevard.

Agency response

Our higher than proportional incidence of stops of black and Hispanic citizens centers around the fact that there are 6 food processing plants within a 45-minute drive of Sedalia. The workers live in and around Pettis, Johnson and Saline counties and drive to the plants daily. Tyson Foods of Dresden, Missouri is the largest food processing plant in Pettis County. These plants employ a large number of Hispanic and black workers. Many of the Hispanic workers are illegal aliens and as such do not appear on the census rolls. Along with this is the fact that the University of Central Missouri is located in Warrensburg, Missouri in Johnson Co. A large number of day and evening students from surrounding counties commute to UCM daily. Vehicle stops by the Sheriff's office are based on traffic violations observed, not the possible race of the drivers. The vast majority of the time the race of the people stopped is unknown until the vehicle is actually stopped. Searches are conducted based on the actions of the individuals stopped or incident to lawful arrest. Race is not a factor in deciding who will or will not be asked for consent to search or who will be searched incident to arrest.

Agency response

Poplar Bluff is considered a Micropolitan Area, which is a regional economic and employment hub. Poplar Bluff is currently ranked 3rd in Missouri in economic output. Our trade area covers an eight county area with a population of 175,000 people. Due to this, our average daily population based on traffic counts using a REMI Model is 60,000+.

Agency response

The City of Raymore, Missouri, maintains the only 24-hour Wal-Mart Supercenter in the entire south Kansas City metropolitan area. The Supercenter services a number of communities, such as Grandview, Raytown, and south Kansas City, all of which have a more racially diverse population than Raymore. It is the position of the Raymore Police Department that any disparities in the proportion of stops/proportion of population can be attributed to the fact that a large portion of the motoring public does not reside within the city limits of Raymore.

RACIAL PROFILING DATA/2008

Agency response

Raytown has numerous main traffic routes through the city, including MO 350 Highway. Approximately 65% of our stops are non-Raytown residents. The Raytown School District serves a population of 60,000, while our city has a population of about 29,000 and 10 square miles.

Agency response

The City of Richmond Heights is a 2.8 sq. mile city incorporated in 1913, located on the western boundaries of the City of St. Louis. Richmond Heights has three miles of U.S. 64 (Highway 40) running directly thru it. Highway I-170 runs north and south from U.S. 64 to the city limits of Clayton. Located in Richmond Heights is the Galleria Shopping Mall and the new Boulevard Shopping District. The Galleria Mall and Boulevard generate approximately 11 million shoppers or visitors each year. Richmond Heights also borders the City of Clayton, which is the county seat for St. Louis County. Thousands of vehicles travel thru Richmond Heights on a daily basis due to its geographic location. Estimate daytime population of Richmond Heights is 26,000.

Agency response

The Riverside Department of Public Safety by policy and practice prohibits racial profiling. The latest census lists Riverside's population as 2,712. However, there are factors which increase the driving population above what would be expected for a town with this population count. Those factors include: a daytime population which grows by 87%; the presence of a riverboat casino; bordering on two major metropolitan cities (Kansas City, MO and Kansas City, KS); and state and federal highway routes traveling through the City with a daily traffic count approaching 300,000 vehicles.

Agency response

The City of Smithville is located at the intersection of U.S. Highway 169 and MO Highway 92, which connects Smithville to the 3 interstate highways: I-29 to the west, I-35 to the east, and I-435, which encircles Kansas City, is located just one mile south of the Smithville city limits.

According to recent figures supplied by MoDOT, approximately 3.9 million vehicles pass through the city each year. The volume of traffic is due to the proximity to the Kansas City metro area for jobs, the large number of families moving to the rural area, and recreational activities associated with the Smithville Lake area. Smithville Lake, located 100 feet from the Smithville city limits, is a 7,000 acre U.S. Army Corps of Engineers recreational lake with 2 public golf courses. Each year, the lake records in excess of one million visitors & an estimated 75,000 rounds of golf are played. Several events are held yearly at the lake including fishing and golf tournaments, and other major festivals through the year. A majority of the year the lake hosts several thousand campers & boaters that travel through the city on a daily basis.
Additionally, the City of Smithville hosts an annual July 4th celebration as well as a fall celebration in September which historically has drawn an estimated 10,000 spectators into the city. Visitors to the lake area travel through our city to reach their destinations.

Agency response

To clarify, we have a large Hispanic community due to poultry processing plants in the area. There are very few “different” ethnic groups other than white in this part of Missouri.

Agency response

I-70 runs through St. Charles and essentially divides the city in half, north & south. The interstate, aside from carrying interstate traffic, is the main artery carrying daily commuter traffic from St. Charles and west of St. Charles to the Greater St. Louis area. St. Charles also contains two highly traveled state highways, Hwy 94 & Hwy 370, which also serve as main arterial routes as well as feeding I-70's local, regional and interstate traffic. State Hwy 364, to a lesser degree, impacts traffic volume in the city. St. Charles is the County Seat of St. Charles County and contains the County Jail, County Courts Bldg. and all of the county's administrative offices. All such business conducted in person with county government is processed in St. Charles and greatly contributes to traffic in the city's core business area. The Historic Main Street District in the heart of St. Charles has many daily attractions and is the site of approx. 75 festivals & special events, drawing crowds from hundreds of miles. The 2 largest festivals, July 4th and the Little Hills Festival in August, have attendance of nearly 100,000. St. Charles has its own convention center; the St. Charles Family Arena w/ seating for over 11,000 causing traffic through the city; the Ameristar Casino draws 10.5 million annually (w/ gaming & other entertainment programs) and is one of the city's biggest employers; and Lindenwood University has a residential population of approx. 3500 students and serves 6,000 commuters.

Agency response

While the data compiled in this report is informative, any conclusions drawn from the data must be tempered with common sense. For example, population data used to calculate the disparity index does not include members of the minority community that reside in the city of St. Louis and, therefore, increases the diversity of drivers on the road within St. Louis County. Nor does the data reflect that in a majority of traffic stops, police officers do not know the race of the driver prior to initiating the traffic stop. Our Department policy specifies that race-based detentions, traffic stops, arrests, searches and seizures of property are forbidden. In 2008 our Department received 326,907 calls for service; officers made 15,755 full-custody arrests and 73,567 traffic stops with no complaints of racial profiling. All commissioned officers participate in annual cultural diversity and sensitivity training and specialized training that prohibits the illegal practice of racial profiling. Supervisors review traffic stop data on a quarterly basis to ensure that officers do not engage in biased based policing.

Agency response

The numbers represented in our data area accurate, but this is an explanation as to why the number of stops conducted by our agency far exceeds the population. We border the Fort Leonard Wood Military installation; we are the business hub for our county; and I-44 dissects our city. I hope this provides valuable insight as to the reason for the disproportional amount of traffic stops.

Agency response

It is unfortunate that our disparity index is based upon the population demographics of the City of Town and Country, which has a population of approximately 11,000 people with an African American population of 1.98 percent. The Town and Country Police Department is committed to the fair and impartial application of the law while attempting to maintain a safe environment for all people who travel in and through our City limits. A careful examination of the data indicates that our practice matches this policy.

Nearly 400,000 motorists travel through our city limits each weekday with the second most voluminous interchange in the state (Interstates 64 and I-270). Our motoring public is reflective of the demographics of the state and St. Louis County, which are comprised of African American populations of 10.25 and 19 percent respectively. The traffic stop data for Town and Country Police Officers indicates that only 2 percent of the motorists stopped are residents of Town and Country. The natural implication of this statistic is that the ratio of the race of motorists stopped for violations would reflect state and county demographics, not the City of Town and Country.

Agency response

We are very unique in our population because of our role in the community. We are a University Police Department with approximately 12,500 students and another 3,000 faculty and staff personnel. Our student population is a diverse cross mix of international students and local community participants. Furthermore, the “transient” or “passing through” driving population is such that it is un-measurable. There are no real community standards or city to base our population on that would be an accurate depiction of our University. In addition, the amount of visitors to our campus for various functions is also un-measurable. It is unknown what percentages of stops are made on University related people, and the number that is just because of happenstance.

Notes: Proportion of stops by racial category/proportion of statewide population of that racial category. A value of 1 indicates local stops within a racial category equivalent to that racial groups proportion in the state population. A value less than 1.0 indicates a lower proportion of stops of that racial group lower than its proportion in the state population. A value greater than 1.0 indicates a higher proportion of that racial group than its proportion of the statewide population.
